

EX:10

10.Design input forms that validate data (e.g., email,phone number) and display error messages using HTML/CSS, JavaScript (with Validator.js)

The screenshot shows a web browser window with the address bar displaying "127.0.0.1:5500/index.html". The page content is a registration form titled "Hotel Management system". The form contains four input fields: "Email:", "Phone Number:", "Full Name:", and "Password:". Below these fields is a green button labeled "Submit".

The screenshot shows the same web browser window, but the form is now filled with data and has validation feedback. The "Email:" field contains "henry" and is highlighted with a red border. Below it, a red error message reads "Please enter a valid email address.". The "Phone Number:" field contains "9876543210" and is highlighted in blue. The "Full Name:" field contains "Henry" and is highlighted in blue. The "Password:" field contains "*****" and is highlighted in blue. The green "Submit" button is still present at the bottom.
